CORE COMPETENCIES

ZenaDrone 1000 aims to revolutionize security, surveillance, inspection, detection, monitoring, and scanning needs of various corporate industries and commercial sectors. The ZenaDrone technology continuously adapts to the different needs of many companies and civil sectors requiring customization of drone attachments to meet business operation specifications.

We offer several customizable drone-as-a-service solutions to meet your organizational needs:

- | | |
|---|--|
|  Surveillance and Tracking |  Machine Learning Systems |
|  Inspection and Monitoring |  Software Development |
|  Scanning and Detection |  Autonomous Flights |
|  Project Management |  On-Site Remote Assist |
|  Artificial Intelligence |  Technical Support |

PAST PERFORMANCE

Scope of Work

Primary scope includes the following drone-as-a-service solutions:

- Plant Tracking and Monitoring
- Field Mapping
- Thermal Scanning
- Multi-spectral Sensor Data Acquisition
- Security Surveillance
- Software Development
- Drone Technology Innovation

DIFFERENTIATORS

- Proven reliability and dependability in every phase of our services
- Responsive to client's business needs pertaining to customizability and assistance
- 24/7 software, hardware, technical and customer support
- Provided comprehensive data analytics with unique reporting and transparency for standard government compliance
- Efficient real-world and people-oriented approaches to addressing business issues

TECHNICAL SERVICES

To guarantee high safety and dependability, we have rigorously tested ZenaDrone unmanned aerial vehicles and smart applications. We uphold the customer-first philosophy, deliver first-rate service, and work to optimize user benefits. Our tech team consistently expands the drone's added value, offering customers knowledgeable business counsel and technical support, demonstrating the creative "smart drone" advantage.

DEDICATED TEAM

Partnering with ZenaDrone Inc. gives you access to cross-functional teams that deliver drone software and hardware services quickly and with quality at the forefront of all we do. Because effective communication is the key to accelerating delivery, all of our specialist tech teams are in the US and have extensive industry knowledge.
